Best Toratec. The Future of Sorting Technologies. Besttoratec introduces new sorting module EASYMEX for maximum product value

Best Toratec is introducing their new sorting equipment - the EASYMEX slide sorter for post sorting applications. It has been designed to easily fit into any existing sorting line and to effectively and economically clean pre-sorted NF-metal fractions, to recover lost NF-metals from other material, or to sort out stainless steel for rapid value increase. The machine is a low budget sorter module for the simple upgrade of your product value. For more information contact Besttoratec at info@besttoratec.com or visit our homepage at www.besttoratec.com
